Today, new pharmaceuticals, better nutrition and preventive veterinary care are helping pets live longer than just a few decades ago. Although senior pets may not have the energy of youth, they still have plenty of love and companionship to offer. Make sure your pet's senior years are happy and healthy by providing the extra attention and veterinary care needed.

Your pet's senior years can be the most rewarding years for you and your pet to share with each other. **Twice yearly wellness exams are recommended to keep your pet in optimum health!**

\*Ming\* - Age 17

### Your Pet's Senior Exam

A senior health screen exam involves state-of-the-art laboratory analysis of your pet's bodily functions. Tests help diagnose blood disorders, kidney and liver disease, diabetes, infection, thyroid, and other hormonal problems before they become apparent. Radiographs can help diagnose heart disease, cancer, and osteoarthritis.

Data from senior health screening exams show that more than 22% of senior dogs and 17% of cats that appear healthy have been found to have significant sub clinical disease.
